PROFESSIONAL SUMMARY

A Front-end Web Developer with 9+ years experience in creating engaging and user-friendly interfaces for websites and web applications, and launching high quality websites for client businesses. A proven track record of leveraging Google Analytics and SEO marketing strategies to drive website traffic and enhance user engagement.

My skills include:

- Design mockups and wireframes into responsive and interactive web pages using HTML5, CSS3, JavaScript, JQuery, React JS and Vue JS.
- Ensure the website or application is compatible and works consistently across different web browsers and devices.
- Optimize front-end code for performance and fast loading times.
- Test and debug front-end code for bugs, compatibility issues and usability problems.
- Collaborate with back-end developers and UX/UI designers to integrate the front-end code with server-side logic, along with user interface designs.
- Use version control systems to manage and track changes to the codebase.
- Stay updated with the latest front-end development trends, tools, and technologies.

WORK EXPERIENCE

Front-End Web Developer

Inox Arabian Technical Services

June - 2019 to present

- Built front-end components for the 3D-based website of the Mbaye Project of the company using HTML5, CSS3, JavaScript, Front-end frameworks JQuery, React JS, Vue JS, PHP, Bootstrap and Laravel.
- Main responsibilities include developing front-end website pages from client requirements and PSD templates ensuring the pages responsiveness and cross-platform optimization and usability.
- Optimized website content, including headings, meta descriptions, and image alt tags, to improve keyword relevance and search visibility. Collaborated with content creators to ensure that new content adheres to SEO best practices.
- Worked along with team members and graphic designers for web design features to meet client needs. Performed other designing and development tasks as assigned by the CEO and Team Leader.
- www.mbaye.com, www.inoxarabia.com
